

[A METHOD FOR TAKING MESSAGES IN A DVD PLAYER]

Abstract

A method of taking messages for a DVD player is provided. The DVD player includes input device, memory, a DVD play module, and an analog-to-digital converter (ADC) module. Firstly, recording the message in the memory of the DVD layer. Thereafter, waiting for a predetermined event. Finally, outputting and displaying the message. The DVD player records and outputs messages according to the DVD player in order to take messages in the present invention.
